

### **AIBT Receives Supplier Excellence Award from TSMC**

Advanced Ion Beam Technology, Inc. (AIBT) has been recognized as one of eight companies receiving Taiwan Semiconductor Manufacturing Company (TSMC) prestigious Supplier Excellence Award in an annual SCM Forum held in Hsinchu, Taiwan, on December 2012. AIBT provides Ion Implant Equipment for the manufacturing of advanced transistor and other material modification applications.

Daniel Tang, President of AIBT, said, "It's a biggest honor for me to represent AIBT to receive this recognition in excellent performance in implanter equipment and it has very significant meaning to AIBT. I like to express our greatest appreciation for TSMC's trust, support, and guidance for the past years. We will continuously enhance our product and technology and add more values to our customers. This award is an excellent acknowledgement of the dedication and perseverance of our team members over the years."

Additional information about the TSMC 2012 Supplier Chain Management Forum can be found on TSMC's website at [www.tsmc.com](http://www.tsmc.com)

### **About AIBT**

AIBT is dedicated to the research, development, and manufacture of ion implantation systems for the semiconductor industry. AIBT provides leading edge ion implantation technology and partners with the world's leading semiconductor manufacturers to develop advanced doping processes that meet the most stringent technical requirements of the future CMOS devices.
